RE Advertise for Bids
IFB 2024-282 Construction, Emergency Generator Fueling System
Replacement

Public Works requests approval to advertise for bids for IFB 2024-282, Construction project to replace the emergency generator fueling system for the Justice Center/Central Plant. Earlier, the system developed a leak resulting in it being taken off line. Small auxiliary tanks have been used in the interim. The new system will utilize above ground tanks, greatly reducing the risk of contamination of the soil. MD Engineering prepared the plans and specifications, which were reviewed and approved by Public Works staff.

The estimated cost of this project is \$1,100,000.00 and funds are available in Road and Bridge Fund balance. The funding will provide a turnkey construction project; however once the actual cost and project timeline have been established a contract with the Engineer for inspection will be required and will be brought to Court at the appropriate time.

Should you require additional information, contact me and I will respond accordingly.
