TO Commissioners Court

FROM Public Works

RE Award 2025-105 Solar-Tech Sign Boards

Public Works requests Commissioners Court consideration and approval to award 2025-105, Solar Tech Sign Boards to Dallas Lite and Barricade, Inc.

The Road & Bridge division has a total of 10 message boards. Currently, there are 3 units that have major repairs issues thus the need for an urgent purchase.

Two (2) of the units have a hydraulic leak from the mast that holds up the sign. When the sign is raised, so that it meets MUTCD standards, it will leak and leave a large puddle of hydraulic oil. This is safety and an environmental issue.

The other unit requires at least four (4) panels to be replaced. These panels are used for driver visibility and also must meet MUTCD standards.

In short, due to a shortage of usable message boards, safety, and environmental hazards, Public Works requests to expedite this urgent, one-time purchase.
