Re: CR 395 Temporary Access

Public Works requests Commissioners Court's consideration and approval to conduct operations on private property to remedy a drainage issue.

South of Princeton, a creek runs parallel to County Road 395 on the north side of the road. Due to progressive erosion of the embankment on the south side, the integrity of the road surface and subgrade will be threatened as the erosion continues. To prevent this, PW staff contacted the landowners of the parcels affected by the condition. Both have agreed to allow PW crews on their property to remedy the situation and have signed the appropriate Temporary Access Agreement.

PW staff plans to perform limited repairs to block further deterioration. Furthermore, PW is contacting an engineering consultant to perform a professional survey of the area and prepare recommendations for a permanent solution.

Should you require additional information, please contact me and I will respond accordingly.
