Re: Collin County Medical & Mental Health

Subject: CO #092 –RFI 264 - Shifted CMU Wall to Accommodate DST01D (RFI #264)

Michael,

Please find the pricing attached for SEDALCO Change Proposal #CO-092.

This cost is associated with the direction provided by RFI 264, where the door frame DST01D is oversized. Therefore, the CMU wall adjacent to it must be shifted to maintain the appropriate space for the door frame. This includes the demolition and the reconstruction of this CMU wall. The roof drains on the exterior of this wall conflicted with the relocation of this wall too. These roof drains were adjusted as well, to accommodate the additional space necessary.

The cost of this change is **\$6,492.94**. Upon acceptance of this proposal, please issue a Change Order to the Contract to reflect the added cost.

Please call or email should you have any questions.

Sincerely,

Will Burgess
Project Manager

Proposed Change Request
CO - 92

ISSUED TO: Collin County
2300 Bloomdale Road, Suite 3160
McKinney, TX 75071

8/26/2025

ATTENTION:

PROJECT: Collin County Mental Health Expansion

PROJECT NUMBER: 24546.

DESCRIPTION: RFI 264 - Shifted CMU Wall to Accommodate DST01D
According to the direction given by RFI 264, the CMU wall on the plan view south of stairwell one must be shifted to accommodate the oversized frame DST01D. The opening shown in the architectural prints only allowed for a 3'-8" door frame at this opening rather than the required 3'-10" frame. This CMU wall must be demoed and shift plan view south, along with the repositioning of the roof drains, and the concrete pour back of these holes.

QUESTION James Hinch on 6/17/2025 10:24 AM (Edited by James Hinch on 6/18/2025 02:09 PM)

According to the attached detention door schedule D702, DST01D is shown to be 3'-10" in width. Sheet A237 only shows this doorway to be 3'-8 1/4" wide, not leaving enough room to place the door frame. See the attached document for the calculations that arrived at this number. While the surrounding CMU wall has already been installed up to 4', it can still be demoed and repositioned plan view south 8" to accommodate this oversized frame. To do this the roof drains at the low roof of 1300 will have to be shifted as well. See the attached sketch on sheet A237 depicting this shift. Advise if the repositioning of the CMU wall and roof drains are acceptable.

COMMENT Michael Woods on 6/19/2025 09:08 PM

The proposed solution is acceptable however if there is cost involved then submit pricing prior to proceeding. A send option is to shift the door plan south to fit within the opening. This ~2" shift will not be ideal but will still be acceptable. This stair door will not be used frequently.

LEVEL 2 - FEMALE SUB-ACUTE FLOOR PLAN

A237

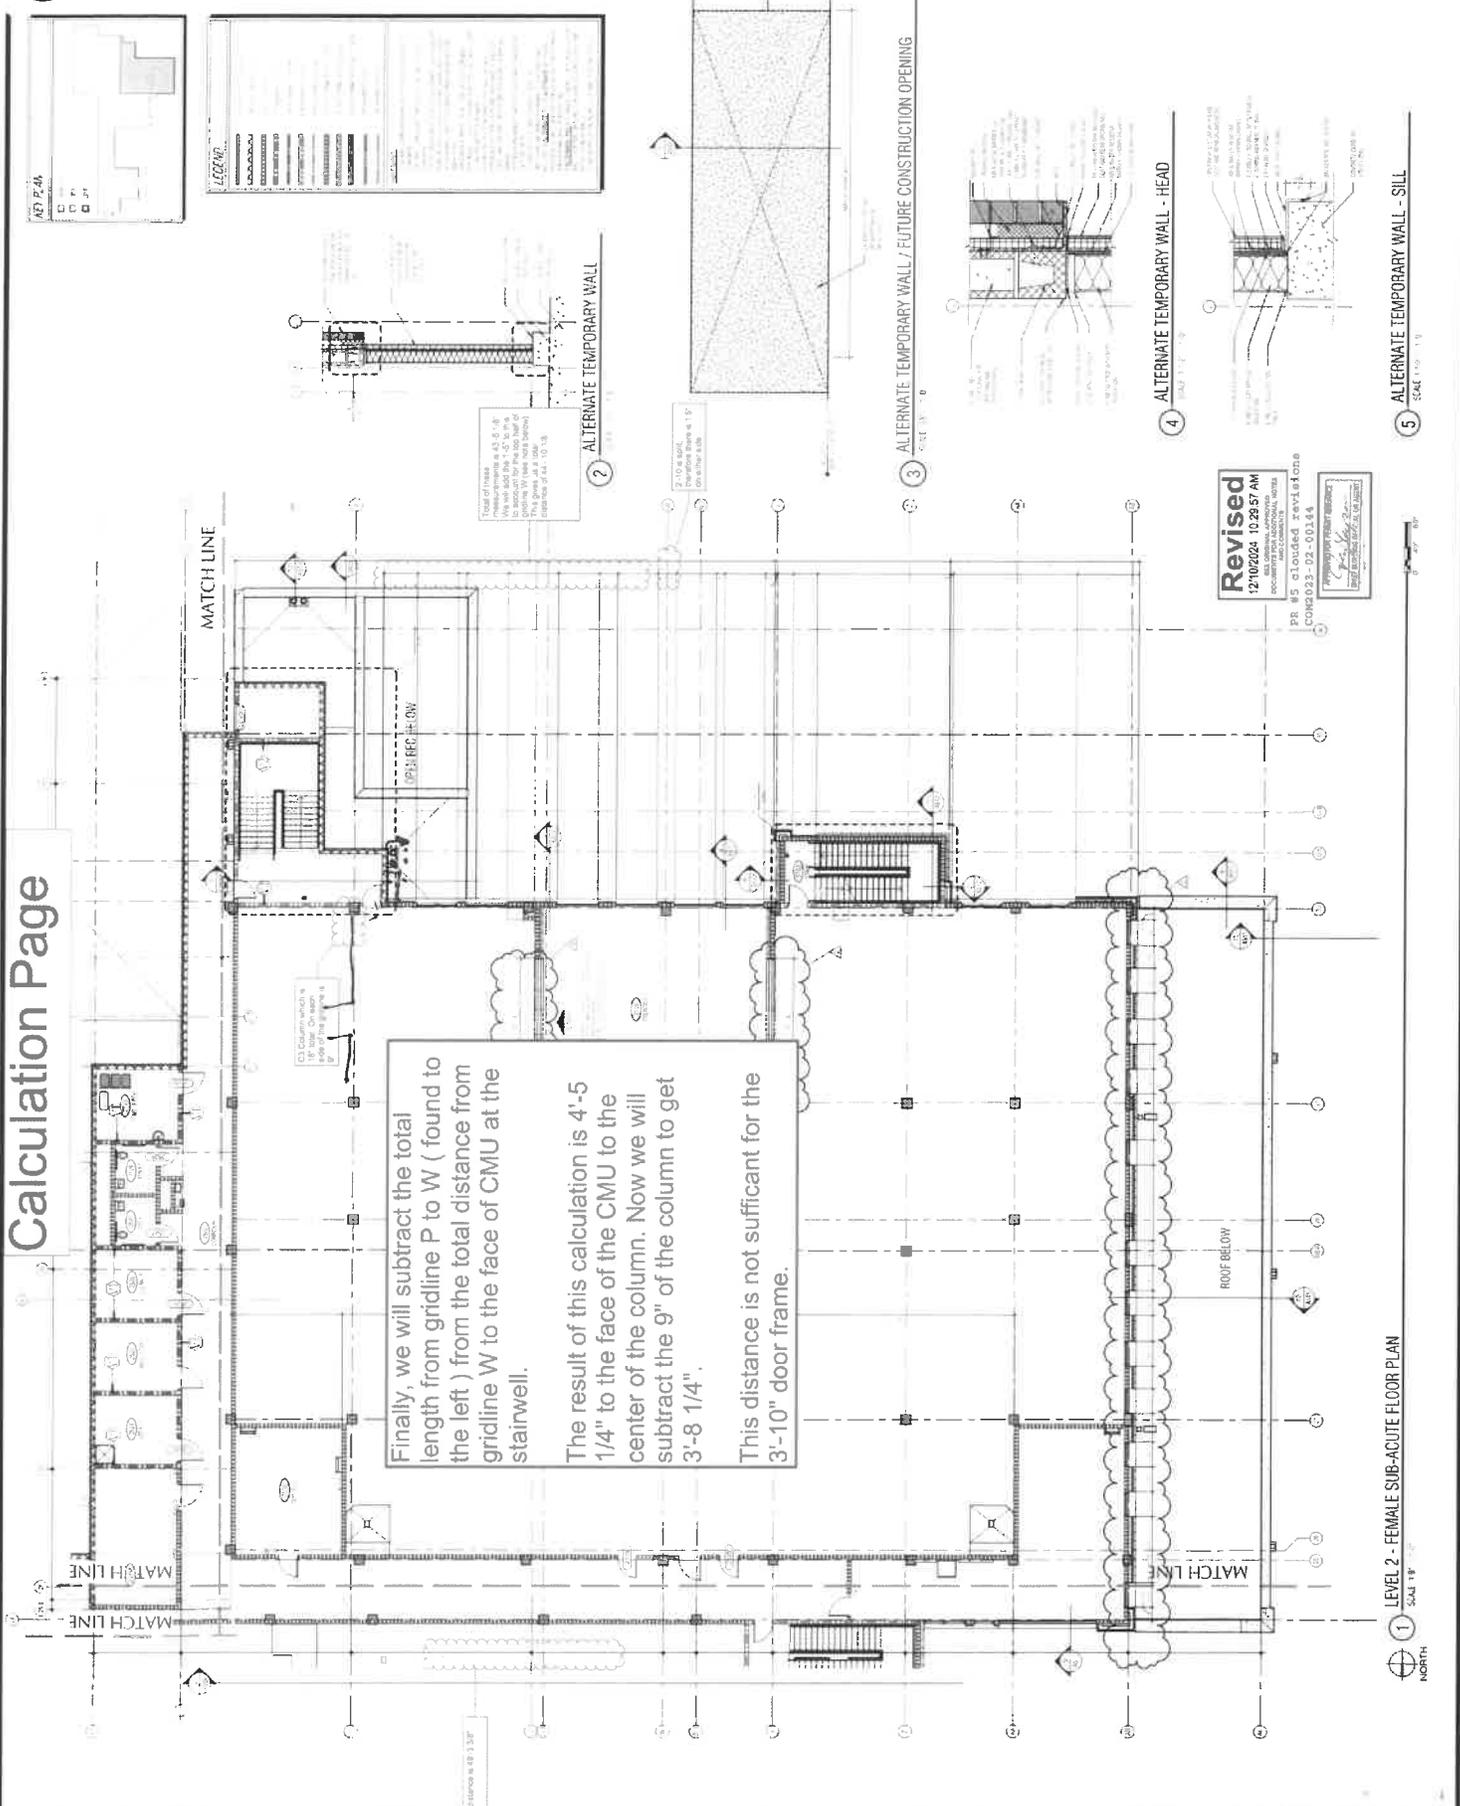

FOR BID

Calculation Page

Finally, we will subtract the total length from gridline P to W (found to the left) from the total distance from gridline W to the face of CMU at the stairwell.

The result of this calculation is 4'-5 1/4" to the face of the CMU to the center of the column. Now we will subtract the 9" of the column to get 3'-8 1/4".

This distance is not sufficient for the 3'-10" door frame.

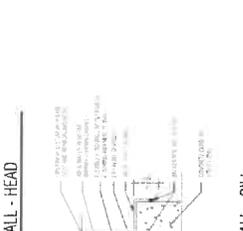

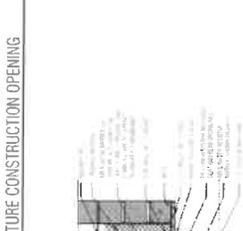

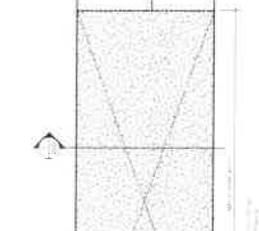

ADP P-46
