MEMO

Date: December 8, 2025
To: Commissioners Court
From: Clarence Daugherty, P.E., Director of Engineering
Subject: Collin County Thoroughfare Plan Revisions-Public Hearing

Potential revisions to the Collin County Thoroughfare Plan have been accumulated over the last several years to be submitted to the Commissioners Court for review and approval of a “revised Thoroughfare Plan”. In addition to our normal process of advertising the proposed changes in a newspaper, we have held two public meetings and notified various property owners of the proposed changes. Approximately 500 comments were made as part of the public involvement process. Over 50 changes were requested to be made to the draft revised plan that was circulated.

The Engineering Department staff and the Burns & McDonnell team are confident that we now have the most acceptable alignments of thoroughfares possible. The proposed revised Thoroughfare Plan will be explained to the Commissioners Court immediately prior to the Public Hearing. After the presentation and the Public Hearing, if the Commissioners Court is satisfied with the proposed revised plan, the Engineering staff recommends the Court approve the revised plan. If the Court finds that some additional changes need to be made, those additional changes can be articulated in a motion to approve the revised plan. If additional changes are requested during the Public Hearing and the Court and/or Engineering staff feels that the requested additional changes need to be studied more, the approval of a revised plan can be postponed until the Engineering staff can make a recommendation concerning the approval of a revised Thoroughfare Plan.
