"FedRAMP" means the Federal Risk and Authorization Management Program. DocuSign eSignature Government Products (but not CLM Government Products) include features and functionality that allow Customers to connect to other DocuSign products or to third-party products or services for interoperability purposes. Interoperability refers to multiple computer systems that are connected in a manner that allows them to exchange information. DocuSign eSignature Government Product features allowing for interoperability currently include DocuSign Payments, Comments and Agreement Actions. A complete list of interoperable eSignature Government Product features can be found at <https://www.docusign.com/legal/terms-and-conditions/esignature-interoperable-features>. These features are disabled by default for new customers but can be enabled by Customer request. Customers may also use "connectors" to connect DocuSign eSignature Government Products or CLM Government Products to other systems to exchange information. For example, a DocuSign/Salesforce Connector can be used to connect DocuSign eSignature Government Products to a Salesforce product so that information may be exchanged between the two connected systems.
