Re: Flock Safety Contract Renewal

During FY26, Public Works officially entered into a contractual agreement with Flock Safety to deploy advanced camera systems and automated license plate readers across targeted locations within the County. This technological initiative was established to address distinct infrastructure vulnerabilities and environmental management concerns by establishing continuous oversight in historically problematic areas.

The primary operational objective of this deployment is to leverage localized data to monitor frequently flooded roadways, allowing for rapid response and improved public safety during severe weather events. Additionally, the network serves as a critical tool for environmental enforcement by monitoring known illegal dumpsites and tracking illicit concrete spills occurring along the Outer Loop. By utilizing this infrastructure, the County aims to mitigate property damage, preserve environmental quality, and hold violators accountable through the strategic application of modern monitoring solutions.

The current agreement with Flock Safety is set to expire on November 9, 2026. To ensure continuity of these critical monitoring services, Public Works respectfully requests Commissioners' Court consideration and approval to extend the existing contract on a month-to-month basis. This temporary extension will prevent any operational gaps until the new Court is formally in place this upcoming January to review a long-term agreement with Flock Safety.

Should you require additional information, please contact me and I will respond accordingly.
