RE: Acceptance of Amendment for the FY26 Tuberculosis Prevention and Control (Contract No. HHS001437400014) with the Texas Department of State Health Services (DSHS)

Attached is the amended budget for the Fiscal Year 2026 Tuberculosis (TB) Prevention and Control grant. This amendment applies specifically to the TB State budget portion of the award for the existing grant period of September 1, 2025 through August 31, 2026. Total funding for the grant remains unchanged at \$384,319.

This amendment adds one new Asset Management Technician position (Position ID: TBD). The position will be funded by two grants: 50% by the FY26 TB State grant and 50% by the FY26 Immunizations grant (as approved under AI-59692). The purpose of this amendment is to align the TB State grant budget with the existing Immunizations grant to fully support this new grant-funded position. Health Care anticipates continued support for this position through the FY27 TB State grant and intends to maintain support for it in the upcoming grant renewal cycle.

The Tuberculosis grant is designated to support reducing the spread of TB, which is a communicable disease spread through the air. The need for TB services in Collin County remains constant and continues to be a critical service provided by the health department. This amendment will support the TB program continue providing public health services.

I respectfully request approval of this amendment.
